Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	Describe customer with 3-4 key characteristics - *who are they?*	Describe the customer and their attributes here
I'm trying to	*List their outcome or "job" the care about - what are they trying to achieve?*	List the thing they are trying to achieve here
but	Describe what problems or barriers stand in the way – *what bothers them most?*	Describe the problems or barriers that get in the way here
because	Enter the "root cause" of why the problem or barrier exists – *what needs to be solved?*	Describe the reason the problems or barriers exist
which makes me feel	Describe the emotions from the customer's point of view – *how does it impact them emotionally?*	Describe the emotions the result from experiencing the problems or barriers

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	a potential home buyer	identify housing price	the available	there are many	uncertain about choosing the right

	or real estate decision maker	patterns and determine which property features influence house prices the most	housing information is scattered and not presented in an easy-to-understand format	variables such as house age, renovation history, and property size that affect the housing market	property and understanding the market trends
PS-2	a real estate analyst or property investor	analyse housing market trends and understand how factors such as bedrooms, bathrooms, floors, and renovation status affect house prices	the housing data is large, complex, and difficult to interpret without proper visualization tools	traditional data tables do not clearly show patterns or relationships between different housing attributes	confused and unable to make accurate data-driven decisions about property investments
